mojogearlc@gmail.com

FUZZ:

Control the gain

« Big sound to Woodstock »

VOLUME:

Control the output

« the neighbors ?... »

SMOOTH:

Control the input impedance

Humbucker or single coil ,
No problem !

« it's pretty damn good »

BIAS:

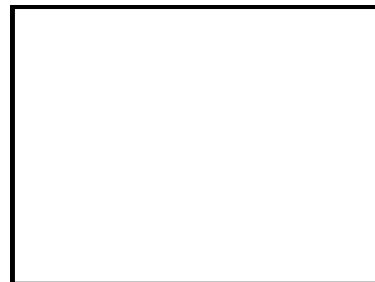

Control the polarization

Simulate used battery with
noise gate , compensate the
environment temperature to
massive and sustain.

« trumpetize..... !!! »

We're very proud with this fuzz deluxe series, not only because of the additional options we introduced with it, but because we think of our Deluxe model as one of our biggest successes.

Cachet

The pedal true bypass of course and features light indicator and power input which is very rare to find in fuzz pedals like this.

Serial:

BC108 / NKT275 / AC128
